FACTORY ADDRESS
ADDRESS: ZHONGDE COOPERATION AREA OF SEMS IN CHENGDU CITY
ADDRESS: 5TH FLOOR BLDG.23,ZHONGJIE NENG INDUSTRIAL PARK,2980
HUANQING ROAD YUSHAN TOWN KUNSHAN CITY.

RECOVERY (HK) TECHNOLOGY LIMITED

RECOVERY (HK) TECHNOLOGY LIMITED is specializing in the production and sales of In-Vitro diagnostic products. We mainly provide blood culture systems and helicobacter pylori urea breath test products to the customers.

Microbial Blood Culture factory

Our Microbial Blood Culture factory was established in 2011 in Sichuan. We are the first microbiology system manufacturer in China that has two methods of blood culture bottle technologies: fluorescence method and chromogen method, which can be compatible with both BioMerieux and BD system.

Production Workshop

Helicobacter pylori detection factory

We specialize in the field of breath detection technology. Our main products are 13C and 14C Urea breath analyzer for helicobacter pylori detection and consumables.

Production Workshop

Certificates and Reputation

RECOVERY-ABC-240

- For in vitro culture detection of bacteria or fungi in blood samples.
- Capacity: RECOVERY-ABC-60 and RECOVERY-ABC-120 can be connected with multiple modules.
- Method: Chromogenic Method, Fluorescent Method.
- Arbitrary temperature zone, automatic constant temperature continuous shaking.
- Light, sound and color alarms.

RECOVERY-ABC-120

- Stable operation, support power failure memory, restore power supply automatically continue cultivation.
- Independent detection sensors, automatic continuous monitoring of each bottle every 10 minutes, can be viewed at any time the dynamic growth curve.

RECOVERY-ABC-60

Intended use:

It is for the culture of aerobic bacteria, anaerobic bacteria, parthenogenetic anaerobic bacteria and fungi in blood specimens.

Blood Culture Bottle of Chromogenic Method

Ref No	Product Name
CSY-01002	Plus/F Aerobic Bottle 30ml
CSY-02002	Plus/F Anaerobic Bottle 40ml
CSY-01004	PEDS/Plus/F Aerobic Bottle 20ml
CSY-02004	PEDS/Plus/F Anaerobic Bottle 20ml
CSY-01001	Standard Aerobic Bottle 40ml
CSY-02001	Standard Anaerobic Bottle 40ml
CSY-01003	Peds Standard Aerobic Bottle 20ml
CSY-02003	Peds Standard Anaerobic Bottle 20ml

Blood Culture Bottle of Fluorescent Method

Ref No	Product Name
CYG-01002	Plus/F Aerobic Bottle 30ml
CYG-02002	Plus/F Anaerobic Bottle 40ml
CYG-01004	PEDS/Plus/F Aerobic Bottle 20ml
CYG-02004	PEDS/Plus/F Anaerobic Bottle 20ml
CYG-01001	Standard Aerobic Bottle 40ml
CYG-02001	Standard Anaerobic Bottle 40ml
CYG-01003	Peds Standard Aerobic Bottle 20ml
CYG-02003	Peds Standard Anaerobic Bottle 20ml

^{13}C -Urea Breath Test

For Detection of Helicobacter Pylori

“Gold Standard”

Product Highlight

- > Sensitivity 95%
- > Specificity 100%
- > Painless and non-invasive
- > Analytical results generated within 3 minutes
- > Applicable for any age

Product Feature

> High Efficiency

Fast operation, 2-3 minutes for one set samples automatic batch testing.

> Simple

One-touch operation, automatic control system.

> Accurate

Good Repeatability.
 $\delta\text{sd} < 0.3\%$

Specifications

1. Power Supply. AC100-240V 50-60Hz
2. Power Consumption. <100W
3. Range of CO_2 Concentration. 0.5-6%
4. Sample Volume. $\geq 120\text{ml}$
5. Dimension. 330mm x 435mm x 236mm
6. Weight. 15kg

EASY

Simple to do, no invasive procedures, no messy collection cups, no painful needles

CONVENIENT

Can be done in your doctor's office or at a lab

FAST

The entire test process takes about 20 minutes

Operation Procedure

Application

Applicable for all ages including pregnant women and children.

¹⁴C-Urea Breath Test

For Detection of Helicobacter Pylori

“Gold Standard”

Product Highlight

- > Specificity 100%
- > Sensitivity 95%
- > Painless and non-invasive
- > Analytical results generated within 4 minutes

Product Feature

> High Efficiency

Fast operation, 3-5 minutes for two samples automatic batch testing.

> Simple

One-touch operation, automatic control system.

> Accurate

Good Repeatability.
Sampling Accuracy $\pm 10\%$

Specifications

- | | |
|-----------------------|---------------------------------|
| 1. Power Supply. | AC220V \pm 22v 50Hz \pm 1Hz |
| 2. Power Consumption. | ≤ 30 VA |
| 3. Input Power | 30VA |
| 4. Period of use | 5 years |
| 5. Dimension. | 445mm x 400mm x 440mm |
| 6. Weight. | 13kg or 16kg |

EASY

Simple to do, no invasive procedures, no messy collection cups, no painful needles

CONVENIENT

Can be done in your doctor's office or at a lab

FAST

The entire test process takes about 20 minutes

Operation Procedure

1. Take about 120ml warm water with 1 urea ¹⁴C capsule.

2. Wait for 10-20 minutes

3. Blow about 3-5 minutes, when the indicator window of the breath card changes from blue to white, stop blowing.

4. Test the breath sample with an analyzer.

Application

Applicable for all ages.
